*Journal of Atmospheric Chemistry* **29**: 339–340, 1998.

# Contents to Volume 29

**Vol. 29 No. 1 January 1998**

M. C. KROL and D. POPPE / Nonlinear Dynamics in Atmospheric Chemistry Rate Equations 1–16

KARIN THOMAS, ANDREAS VOLZ-THOMAS, DJURO MIHELCIC, HERMAN G. J. SMIT and DIETER KLEY / On the Exchange of $NO_3$ Radicals with Aqueous Solutions: Solubility and Sticking Coefficient 17–43

N. HAVERS, P. BURBA, J. LAMBERT and D. KLOCKOW / Spectroscopic Characterization of Humic-Like Substances in Airborne Particulate Matter 45–54

M. VAN ROOZENDAEL, P. PEETERS, H. K. ROSCOE, H. DE BACKER, A. E. JONES, L. BARTLETT, G. VAUGHAN, F. GOUTAIL, J.-P. POMMEREAU, E. KYRO, C. WAHLSTROM, G. BRAATHEN and P. C. SIMON / Validation of Ground-Based Visible Measurements of Total Ozone by Comparison with Dobson and Brewer Spectrophotometers 55–83

D. J. BOWDEN, S. L. CLEGG and P. BRIMBLECOMBE / The Henry's Law Constants of the Haloacetic Acids 85–107

**Vol. 29 No. 2 February 1998**

U. C. KULSHRESTHA, A. SAXENA, N. KUMAR, K. M. KUMARI and S. S. SRIVASTAVA / Chemical Composition and Association of Size-Differentiated Aerosols at a Suburban Site in a Semi-Arid Tract of India 109–118

F. MELEN, E. MAHIEU, R. ZANDER, C. P. RINSLAND, P. DEMOULIN, G. ROLAND, L. DELBOUILLE and C. SERVAIS / Vertical Column Abundances of $COF_2$ Above the Jungfraujoch Station, Derived from Ground-Based Infrared Solar Observations 119–134

NORIMICHI TAKENAKA, TOHRU DAIMON, AKIHIRO UEDA, KEIICHI SATO, MASARU KITANO, HIROSHI BANDOW and YASUAKI MAEDA / Fast Oxidation Reaction of Nitrite by Dissolved Oxygen in the Freezing Process in the Tropospheric Aqueous Phase 135–150

ERIK KJELLSTRÖM / A Three-Dimensional Global Model Study of Carbonyl Sulfide in the Troposphere and the Lower Stratosphere 151–177

P. J. CRUTZEN, N. F. ELANSKY, M. HAHN, G. S. GOLITSYN, C. A. M. BRENNINKMEIJER, D. H. SCHARFFE, I. B. BELIKOV, M. MAISS, P. BERGAMASCHI, T. RÖCKMANN, A. M. GRISENKO and V. M. SEVOSTYANOV / Trace Gas Measurements Between Moscow and Vladivostok Using the Trans-Siberian Railroad 179–194

N. IWAGAMI, S. INOMATA and T. OGAWA / Doppler Detection of Hydroxyl Column Abundance in the Middle Atmosphere: 2. Measurement for Three Years and Comparison with a 1D Model 195–216

**Vol. 29 No. 3 March 1998**

YASUHITO IGARASHI, KATSUMI HIROSE and MAKIKO OTSUJI-HATORI / Beryllium-7 Deposition and Its Relation to Sulfate Deposition 217–231

SAMANTHA F. M. ASHBOURN, MICHAEL E. JENKIN and KEVIN C. CLEMITSHAW / Laboratory Studies of the Response of a Peroxy Radical Chemical Amplifier to $HO_2$ and a Series of Organic Peroxy Radicals 233–266

MICHAEL E. JENKIN, ANDREW A. BOYD and ROBERT LESCLAUX / Peroxy Radical Kinetics Resulting from the OH-Initiated Oxidation of *1,3*-Butadiene, *2,3*-Dimethyl-*1,3*-Butadiene and Isoprene 267–298

P. C. MOONEN, J. N. CAPE, R. L. STORETON-WEST and R. McCOLM / Measurement of the NO + $O_3$ Reaction Rate at Atmospheric Pressure Using Realistic Mixing Ratios 299–314

IRENA GRGIĆ, ANDREJA DOVŽAN, GORAZD BERČIČ and VIDA HUDNIK / The Effect of Atmospheric Organic Compounds on the Fe-Catalyzed S(IV) Autoxidation in Aqueous Solution 315–337

Volume Contents 339–340
